Ola Ride Analytics Insights

SQL Insights

1️⃣ Retrieve All Successful Bookings

Query

```
select * from cleaned_ola_data
where Booking_status = "Success";
```

Fetch rides where Booking_Status = “Success” / “Completed”

📊 Insight:

- Successful rides represent the core revenue-generating transactions.
- Comparing this with total rides gives success rate.

2️⃣ Average Ride Distance per Vehicle Type

Query

```
select
  Vehicle_Type,
  avg(Ride_Distance) as Avg_ridedistance
from cleaned_ola_data
group by Vehicle_Type;
```

📊 Insight:

- Premium vehicles (SUV / Prime Sedan) show higher average ride distance.
- Economy vehicles handle shorter trips.

3️⃣ Total Number of Cancelled Rides by Customers

Query

```
select
  Canceled_Rides_by_Customer,
  count(*) as Total_rides
from cleaned_ola_data
where Booking_Status = 'Canceled by Customer'
group by Canceled_Rides_by_Customer;
```

📊 Insight:

- Customer cancellations impact revenue and driver productivity.
- If high, indicates dissatisfaction.

4️⃣ Top 5 Customers by Number of Rides

Query

```
select
  Customer_ID,
  count(*) as total_rides
from cleaned_ola_data
group by Customer_ID
order by total_rides desc
limit 5;
```

📊 Insight:

- A small group of customers contributes large ride volume.
- High repeat usage indicates loyalty.

5️⃣ Rides Cancelled by Drivers (Personal / Car Issues)

Query

```
SELECT Booking_Status,
    Canceled_Rides_by_Driver,
    COUNT(*)
FROM cleaned_ola_data
GROUP BY Booking_Status, Canceled_Rides_by_Driver;
```

📊 Insight:

- Driver-side cancellations reduce reliability.
- Car-related issues show maintenance problems.

6️⃣ Max & Min Driver Ratings for Prime Sedan

Query

```
select
 max(Driver_Ratings) as Max_rating,
 min(Driver_Ratings) as Min_rating,
 Vehicle_Type from cleaned_ola_data
where Vehicle_Type = 'Prime Sedan';
```

📊 Insight:

- High max rating shows premium service quality.
- Low min rating highlights service inconsistency.

7️⃣ Rides Paid Using UPI

Query

```
select * from cleaned_ola_data
where Payment_Method = 'UPI';
```

📊 Insight:

- Digital payment adoption is high.
- Cash usage declining.

8️⃣ Average Customer Rating per Vehicle Type

Query

```
select
   avg(Customer_Rating) as Avg_customer_rating,
   Vehicle_Type
from cleaned_ola_data
where Customer_Rating is not null
group by Vehicle_Type;
```

📊 Insight:

- Premium vehicles generally receive higher ratings.
- Lower categories may show slight dissatisfaction.

9️⃣ Total Booking Value of Successful Rides

Query

```
select sum(Booking_Value) as Total_revenue
from cleaned_ola_data
where Booking_Status = 'Success';
```

📊 Insight:

- Revenue directly tied to completed rides.
- Cancelled rides represent lost revenue opportunity.

1️⃣0️⃣ Incomplete Rides with Reason

Query

```
select
```

```
    Booking_ID,
    Booking_Status,
    Incomplete_Rides,
    Incomplete_Rides_Reason
from cleaned_ola_data
where Incomplete_Rides = 'Yes'
and Incomplete_Rides_Reason is not null;
```

📊 Insight:

- Common incomplete reasons:
  - Driver unavailable
  - Customer no-show
  - Technical issues

Power BI Insights

1️⃣ Ride Volume Over Time

Insight:

- Ride demand remains relatively stable with noticeable peaks on weekends.
- Certain days show sudden drops — possibly due to high cancellations or driver shortages.

2️⃣ Booking Status Breakdown

From cancellation queries:

Insight:

- A significant percentage of bookings are cancelled.
- Cancellation rate impacts revenue and customer trust.

If cancel rate > 30%:
That is operationally high.

3️⃣ Top 5 Vehicle Types by Ride Distance

Insight:

- Prime Sedan and SUV categories generate higher ride distances.
- Mini rides dominate volume but not revenue.

4️⃣ Average Customer Ratings by Vehicle Type

Insight:

- Premium vehicles show higher ratings.
- Lower-tier vehicles may have slightly lower satisfaction scores.

5️⃣ Cancellation Reasons (Customer vs Driver)

From SQL cancellation breakdown:

Customer-side cancellations:

- Long wait time
- Price surge dissatisfaction

Driver-side cancellations:

- Personal issues
- Car breakdown

6️⃣ Revenue by Payment Method

Insight:

- UPI / Digital payments dominate.
- Cash usage is decreasing.

7️⃣ Top 5 Customers by Booking Value

Insight:

- Small percentage of users generate large revenue share.
- Frequent riders are high-value customers.

8️⃣ Ride Distance Distribution Per Day

Insight:

- Short-distance rides are majority.
- Long-distance rides generate bulk revenue.

9️⃣ Driver vs Customer Ratings Correlation

Insight:

- Higher driver ratings correlate with higher customer ratings.
- Poor driver behaviour directly affects satisfaction.
